

2 COMMAND AND CONTROL SQUADRON

MISSION

The 2 Command and Control Squadron commanded passive surveillance systems supporting USSPACECOM and theater warfighters' requirements through continuous all-weather, day-night surveillance of on-orbit satellites.

The 2 Command and Control Squadron was responsible for planning, assessing, and developing execution orders for passive surveillance missions around the world, at locations such as Misawa AB, Japan, Osan AB, Republic of Korea, RAF Feltwell, United Kingdom and RAF Edzell, United Kingdom. Information from the sites' Low Altitude Surveillance System and Deep Space Tracking System were fed to the 2nd Command and Control Squadron, which was then forwarded onto the space surveillance center at Cheyenne Mountain AFS, Colorado. The center uses this data, along with data from other sensors, to maintain a catalog of man-made objects in space.

LINEAGE

2 Command and Control Squadron

STATIONS

Falcon (later Schriever) AFB, CO

ASSIGNMENTS

COMMANDERS

Lt Col T. Clark
