Decorations

EMBLEM

Light blue, issuant from base a sphere light green with land areas vert, grid lined azure, the sinister quarter of the last with grid lines of the field, above the sphere in chief an olive branch arched fesswise or, overall an aircraft and a missile bendwise each trailing speedlines of the like and all within a diminished border of the last. **SIGNIFICANCE:** Against a background of blue sky to indicate the primary theater of operations for the USAF, a globe represents SAC's global deterrent capability. The light and dark portions symbolize day and night vigilance of strategic fighting forces over the free world and those portions of the world under the spreading influence of Communism. The olive branch at the top of the emblem represents the desire of the American people for peace, and the missile and aircraft are symbols of SAC's deterrent capability to provide the forces to preserve this peace. (Approved, 4 Jan 1961)

MOTTO

NICKNAME

OPEATIONS

Activated in the United States in October 1940, the wing moved to Puerto Rico where it remained until inactivated in October 1941. Following second activation, it moved in May 1943 to England for duty with the Eighth Air Force. Groups assigned in September 1943 began strategic bombing of enemy aircraft, petroleum, and ball bearing industries as well as German airfields. Later, organizational units took part in the famous raid against the ball bearing industry at Schweinfurt in October 1943 and followed with missions against shipyards and shipbuilding installations at Wilhelmshaven and Bremen. During the 1960s, the division

organized, manned, trained, and equipped several strategic missile wings in Wyoming.
