NICKNAME

OPERATIONS

The 1808th AACS Wing, with headquarters in Tokyo, was responsible for air traffic control and air communications services for the entire Far East and Pacific areas. The wing commanded the 1809th AACS Group based in Japan, the 1810th AACS Group in Hawaii, and the 1811th AACS Group on Okinawa. Each of these groups was assigned squadrons and detachments for the various airfields, operating control towers, direction finder stations, and several Military Air Traffic Control (MATCon) communications centers. The only AACS facility in Korea at the time, however, was a low-power homing beacon at Kimpo Airport, outside the capital city of Seoul, which soon fell into enemy hands.
