

38 OPERATIONS SUPPORT SQUADRON

MISSION

The 38 OSS manages the human and financial resources used to provide cyberspace engineering and implementation capabilities across the Air Force and operates the global cyberspace infrastructure planning system.

The 38 OSS is responsible for all areas of personnel management to include employment planning, performance management, and disciplinary issues. They support the war fighter by providing timely and relevant financial management information and oversee the POM process for the Group. Manage Operations and Maintenance as well as customer funds to include AF Work Plan dollars. Government and contractor personnel manage the Cyberspace Infrastructure Planning System. This is the AF enterprise tool of choice for tracking telecommunication EI requirements cradle-to-grave and provides a collaborative environment for jointly managing the cyberspace infrastructure. Information Technology professionals are responsible for a multitude of areas in support of the group such as Information Assurance, Emission Security, hardware/software management and also frequently called upon to support 38 ES SMTs.
