MORS AB ALTO - Death from Above

OPERATIONS

The First Army Observation Group, made up of the 24th and 91st Aero [Observation] and the 9th Aero [Night Observation] Squadrons, performed photographic reconnaissance and day and night visual reconnaissance of the battle field area, especially in the enemy's rear areas opposite the area of attack, Sep-Nov 1918. Demobilized in France in Apr 1919.

1st Army Observation Group established 1 Oct 1919 at Park Field, TN. Inactivated less than two years later, on 30 Aug 1921. Activated again as the 7th Bombardment Group on 1 Jun 1928. For the

next eleven years, engaged in training activities, flights of mercy, experimentation with air refueling and air transport of supplies, and participation in various exercises and air shows. Group was in the process of moving to the Philippines when the Japanese attacked Pearl Harbor on 7 Dec 1941. Six of the Group's B-17 aircraft reached Hawaii during the enemy attack but landed safely. The ground echelon, on board a ship in the Pacific Ocean, was diverted to Australia. The air echelon moved its B-17s via North Africa and India to Java, where from 14 Jan to 1 Mar 1942, it operated against the Japanese advancing through the Philippines and Netherlands East Indies. Reunited with the ground echelon in India in Mar 1942, the group resumed combat under Tenth Air Force against targets in Burma. It received B-25s and LB-30s in early 1942 but by the end of the year had converted entirely to B-24s. From then through Sep 1945, bombed airfields, fuel and supply dumps, locomotive works, railways, bridges, docks, warehouses, shipping, and troop concentrations in Burma and struck oil refineries in Thailand, power plants in China and enemy shipping in the Andaman Sea. Ceased bombing operations in late May 1945 and was attached to the Air Transport Command to haul gasoline from India over the Himalayas to China. Returned to US in Dec 1945 and inactivated the following month.

Activated on 1 Oct 1946 as a B-29 bombardment group. Received its first B-36 in late 1948 and by mid-1949 completed conversion. Began flying B-36Ds equipped with jet pods in Aug 1950 but on 16 Feb 1951 became a paper organization. With all assigned flying squadrons reassigned directly to the 7th Bombardment Wing, the group inactivated on 16 Jun 1952.

As part of a major Air Force-wide reorganization, the Group was redesignated 7th Operations Group and again became the combat element of the 7th Wing. It controlled two B-52 squadrons and one KC-135 air refueling squadron. When flying operations ended at Carswell AFB, TX in Dec 1992, the group inactivated the following month.

Upon activation of the 7th Wing at Dyess AFB, TX on 1 Oct 1993, the group again activated as the combat element of the wing. Equipped with B-1Bs and C-130s, the group's mission included bombardment and tactical airlift. It lost its airlift responsibilities in Apr 1997. At that time it also gained a conventional bombing mission.

In Nov 1998, deployed several aircraft to Oman in support of Operation Desert Fox, where the B-1 flew its first combat missions on 17 and 18 Dec 1998. Since 1999, trained bomber aircrews for global conventional bombing.
