

# **63 AAF BASE UNIT (RADAR BOMB SCORING)**

## **MISSION**

## **LINEAGE**

63 AAF Base Unit (Radar Bomb Scoring), 24 Jul 1946-8 Mar 1947

## **STATIONS**

Colorado Springs, Colorado

Mitchel AFB, New York, Aug 1945

Colorado Springs, Colorado, 5 Mar 1946

## **ASSIGNMENTS**

## **COMMANDERS**

## **HONORS**

**Service Streamers**

**Campaign Streamers**

**Armed Forces Expeditionary Streamers**

**Decorations**

## **EMBLEM**

## **MOTTO**

## **OPERATIONS**

During World War II, allied bomber crews soon discovered that radar was an indispensable aid for strategic bombing. The British employed their bomber forces primarily at night. Thus a means of sighting independent of visibility was required. The American forces also required such a system even though they bombed in daylight. The weather in Europe was so consistently bad during the

winter months that strategic bombing could only be accomplished with a radar system. The British were the pioneers in developing such systems while the industrial complex of the U.S. refined and improved their initial efforts.

When victory in Europe seemed assured, military efforts focused in the Pacific. Here it became clear that training procedures for radar bombing were in their infant stages and severely lacking. To correct this, staff work began to develop a training system which would improve crew proficiency in radar bombing through better scoring techniques. Under the jurisdiction of the Army Air Force Tactical Center, an experimental station was established in Jacksonville, Florida to test the training system. These tests proved the value of radar bomb scoring as a means of improving bombing training.

Soon thereafter, the Second Air Force took actions to establish a radar bomb scoring station at Kansas City, Missouri, and later, a scoring detachment at Fort Worth, Texas. HQ Second Air Force originally had jurisdiction over this operation but as it grew in size and scope, it became clear that a formal organization was needed to control and manage the new training detachment. This need gave birth to the organization of which you are part now.

***On 6 June 1945, the 206th Army Air Force Base Unit (RBS) was activated at Colorado Springs, Colorado under the command of Colonel Robert W. Burns. He assumed operational control of the two SCR-584 radar detachments located at Kansas City and Fort Worth. New detachments were also established at Denver, Chicago, Omaha, Albuquerque and Los Angeles. On 24 July 1945, the 206th was redesignated the 63rd AAFBU (RBS) and three weeks later was moved to Mitchell Field, New York, and placed under the command of the Continental Air Force. On 5 March 1946, the organization moved back to Colorado Springs and on 8 March of the same year was redesignated the 263 AAFBU.***
