NICKNAME**OPERATIONS**

Activated in the Reserve in 1949 to train as a fighter corollary of the 52d Wing (Regular Air Force), but apparently undermanned and thus performed very little training. During its only 2-week summer encampment (12-26 Jun 1950), the wing had only four pilots capable of flying F-82s. Even nonflying units of the 84th Wing seem to have been poorly manned, and the 52d Wing made little use of its corollary units. The 84th Wing was ordered to active service on 1 Jun 1951, inactivated the next day, and its few people became "fillers" in other USAF units.
