EMBLEM

Approved on 19 Sep 1983, revised on 15 Sep 2010

EMBLEM SIGNIFICANCE

The blue field represents the sky, the primary theater of Air Force operations. The white arrow represents all Air Force requirements for radio frequency spectrum support. The prism (white triangle) represents the meeting of the requirements by providing spectrum support in different portions of the frequency spectrum, represented by the four colored arrows emerging from the bottom of the prism. The colors of the four arrows represent the use of the entire spectrum (red being the lowest frequency, yellow and green being intermediate frequencies, and violet being the highest frequency in the visible spectrum). The globe signifies worldwide support. The lightning bolt represents the electronic nature of the systems and programs supported. Yellow represents the sun and the excellence required of Air Force personnel.

MOTTO

Across the Spectrum--Indicates that the center provides this support across the full spectrum of conflict

NICKNAME

OPERATIONS

Plan, provide, and preserve access to the electromagnetic spectrum for Air Force and selected DOD activities in support of national policy objectives, systems development, and global operations Develop and implement spectrum guidelines and instructions to support the Air Force mission Coordinate actions to resolve spectrum interference incidents involving DOD, private sector, federal, and international users Provide functional management for the spectrum management career field and oversee curriculum for spectrum management courses
